Unique cluster count
* phage holin family protein
* DNA polymerase III subunit alpha
* GTP cyclohydrolase I FolE
* carboxypeptidase regulatory−like domain−containing protein
* bifunctional homocysteine S−methyltransferase/methylenetetrahydrofolate reductase
* urea carboxylase
* hypothetical protein
* DUF4145 domain−containing protein
* bifunctional homocysteine S−methyltransferase/methylenetetrahydrofolate reductase
* S−layer homology domain−containing protein
* helicase−related protein
* hypothetical protein
* phage tail spike protein
* helicase−related protein
* phage tail spike protein
* hypothetical protein
* DUF1533 domain−containing protein
* phage tail tape measure protein
* Ig−like domain−containing protein
* type I−B CRISPR−associated protein Cas5b
* ATP transferase domain−containing protein
* helix−turn−helix domain−containing protein
* glycosyltransferase
* Ig−like domain−containing protein
* DNA sulfur modification protein DndD
* S−layer homology domain−containing protein
* BREX−1 system adenine−specific DNA−methyltransferase PglX
* bifunctional homocysteine S−methyltransferase/methylenetetrahydrofolate reductase
* DNA translocase FtsK
* BREX−1 system adenine−specific DNA−methyltransferase PglX
* BREX−1 system phosphatase PglZ type A
* leucine−rich repeat protein
* sigma−54−dependent Fis family transcriptional regulator
* DNA polymerase III subunit alpha
* diguanylate cyclase
* adenosylcobalamin−dependent ribonucleoside−diphosphate reductase
* restriction endonuclease subunit S
* DISARM system helicase DrmA
* S−layer homology domain−containing protein
* S−layer homology domain−containing protein
* chromosome segregation protein SMC
* AAA domain−containing protein
* flagellar protein FlgN
* type 2 lanthipeptide synthetase LanM family protein
* helicase−related protein
* glycosyl hydrolase family 28−related protein
* IS1182 family transposase
* phage tail tape measure protein
* restriction endonuclease subunit S
* AAA domain−containing protein
* BglG family transcription antiterminator
* S−layer homology domain−containing protein
* Ig−like domain−containing protein
* DNA translocase FtsK
* glycoside hydrolase family 65 protein
* Ig−like domain−containing protein
* glycosyltransferase
* class I SAM−dependent methyltransferase
* DNRLRE domain−containing protein
* pyridoxal phosphate−dependent aminotransferase
* glycosyltransferase
* NAD(P)/FAD−dependent oxidoreductase
* DNRLRE domain−containing protein
* AAA family ATPase
* ATP−grasp domain−containing protein
* ribonuclease H−like domain−containing protein
* primary−amine oxidase
* twin−arginine translocase subunit TatC
* bifunctional homocysteine S−methyltransferase/methylenetetrahydrofolate reductase
* hypothetical protein
* AAA domain−containing protein
* twin−arginine translocase subunit TatC
* ATP−binding protein
* ribonuclease H−like domain−containing protein
* ATP−binding protein
* cation diffusion facilitator family transporter
* carbohydrate ABC transporter permease
* DsbA family protein
* DCC1−like thiol−disulfide oxidoreductase family protein
* RNA polymerase sigma factor
* peptidoglycan−binding domain−containing protein
* DUF2584 domain−containing protein
* hypothetical protein
